

ICL PKplus – High K

Five essential nutrients in one application with extra potassium

Description

ICL PKplus[®] High K is the one to reach for if your soil's lacking in potassium: its premium granules feature our Polysulphate[®] technology inside, so plants have a continuous sulfur supply throughout the crop cycle, and sulfur leaching is kept to a minimum. The boost of potassium will ensure great quality growth and improved water management in your crops. The High K formulation features potassium, phosphorus, sulfur, magnesium, and calcium, all in one single application.

Benefits

- \\ A high-potassium blend combined with our Polysulphate[®] technology
- \\ Potassium, phosphorus, sulfur, magnesium, and calcium in one solution
- \\ Gives a quality yield, and useful with soils with low potassium levels

How to use

- 1 Apply directly to fields, orchards, and plantations.
- 2 When bulk blending, this product can be combined with nitrogen (N) fertilizers.
- 3 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
