PRIMO MAXX® II LINE MARKING ADVICE

Independent trials at STRI have shown line marking in tank mix combination with Primo Maxx II (lower logo) can reduce frequency of marking by up to 50% compared to paint alone (top logo) and retains a strong healthy playing surface.

IN BRIEF

Mixing Primo Maxx II with line marking paint helps preserve line quality and visibility for up to 50% longer

Primo Maxx II suppresses turf growth for up to six weeks

Tested and approved with full range of commercial paints and line marking equipment

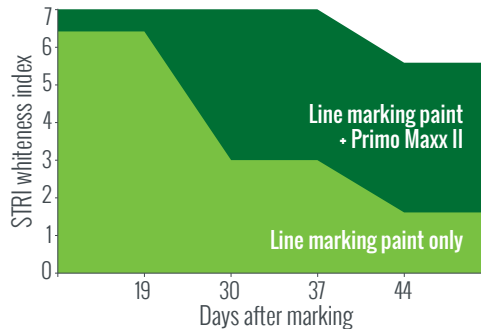

No damage to turf or need to re-seed

Low cost, low rate of use

Significantly reduce line marking paint costs

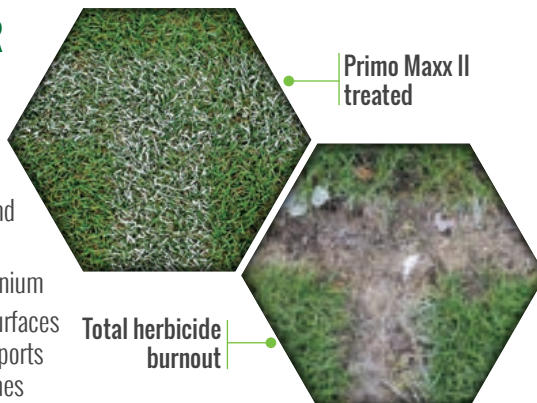

PROVEN LINE RETENTION

STRI trials have shown line marking visibility remains for up to twice as long with the inclusion of Primo Maxx II in line marking paint (above). Primo Maxx II has been tested and approved with a full range of line marking paints.

PRIMO BENEFITS OVER BURNT OUT LINES

- Healthy turf cover is retained
- No bare earth for weeds to get in
- No requirement for over seeding and the end of the season
- Lower cost than glufosinate ammonium
- At the end of the season playing surfaces can be simply converted to other sports without unsightly/confusing old lines

LINE MARKING APPLICATION RATE

Apply Primo Maxx II at a rate of 2 ml per litre of line marking paint solution.

Primo Maxx II can be pre-mixed with line marking paint for wheel-to-wheel applicators. With direct injection spray line-marking applicators, mix Primo Maxx II in the clean water-tank.
