

Celadon

Selective herbicide
for the **control**
of **common**
broad-leaved weeds

A trusted selective herbicide formulation

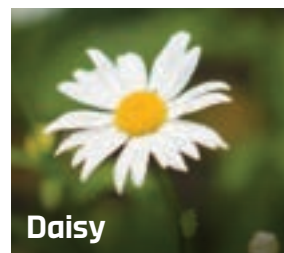

Celadon is a trusted selective herbicide formulation for the control of Daisy, Dandelion, Clover, Buttercup, Ribwort Plantain, Slender Speedwell and other broad-leaved weeds in managed amenity turf, including domestic lawns.

Key Points

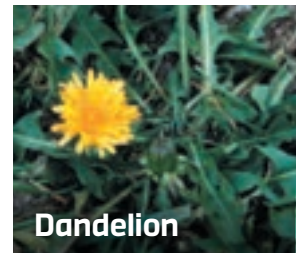

- **Trusted formulation contains the active ingredients florasulam and fluoxypyr**
- **Low application rate (2 L/ha)**
- **Low water rate even for knapsack application (200 L/ha water)**
- **Controls weeds such as Slender Speedwell**
- **Can be used on newly established turf (2 leaf stage)**

Areas of use

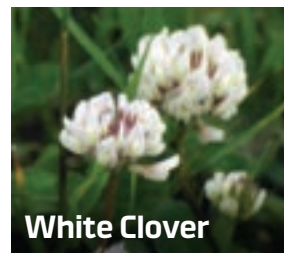

- ✔ Tees
- ✔ Fairways
- ✔ Stadia Pitches
- ✔ Sports Pitches
- ✔ Outfields
- ✔ Racecourses/ Gallops
- ✔ Lawns

Daisy

Dandelion

White Clover

Buttercup

Ribwort Plantain

Slender Speedwell

Product characteristics

Formulation type:	Liquid (SE)
Technology:	Selective herbicide
Pack size:	2 litre
Pack coverage:	10,000m ²
MAPP:	19364
Contains:	100g/L fluroxypyr and 2.5g/L florasulam

Application notes

Celadon can be applied to newly sown or established managed amenity turf, including domestic lawns, and amenity grassland.

Ensure newly sown turf has become established before treating. Turf sown in spring or summer may be ready for spraying at or after two leaf growth stage, usually two months after sowing, but turf sown in late summer or autumn should not be sprayed until growth is resumed in the following spring, perhaps eight months after sowing.

Application information

Application rate:	2 L/ha
Water volume:	200 L/ha
Knapsack dilution rate:	20ml of Celadon in 2 litres of water
Maximum number of treatments:	1 per year
Application notes:	Apply when weeds are in active growth, normally from March to October.

When to use Celadon

Apply when the soil is moist in March to October.

Always read the label and product information before use. Celadon is a trademark of Corteva.
