

ICL PKplus – Balanced

Five essential nutrients in one application

Description

ICL PKplus® Balanced contains a good even blend of phosphorus and potassium, and a special secret inside its granules: our advanced Polysulphate® technology, which supplies plants with a constant sulfur source, avoiding any leaching or overdosing. It also features magnesium and calcium, so your crops will have five essential elements in one application. It's ideal if your soil is low in phosphorus and potassium, and it's great for boosting crop quality. You'll enjoy healthy plants and a good yield.

Benefits

- \\ A balanced blend of P and K combined with our Polysulphate® technology
- \\ Potassium, phosphorus, sulfur, magnesium, and calcium in one solution
- \\ Gives a quality yield, and useful with low phosphorus/potassium soils

How to use

- 1 Apply directly to fields, orchards, and plantations. When bulk blending, this product can be combined nitrogen (N) fertilizers.
- 2 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
